HX-2500 Features, suitable for Hospitality and Retail

Hospitality Features

Phoenix Tablet System Ordering -

The HX-2500 can be linked to Android devices running Uniwell's own Phoenix POS application. No dedicated terminals are required. Up to 20 Android devices can be connected to an HX-2500 for table service order entry.

Improved Promotion Control -

A range of multi-buy, combos and meal deals can be configured on the HX-2500. In addition, it is also possible to schedule price changes for "Happy Hour" style promotions. It is important to be able to configure and run promotions but it is even more important to monitor the impact of the promotion. The HX-2500 provides detailed pricing reports that show the results of the promotion.

Web-ordering-

the HX-2500 is integrated with third party web-ordering providers where orders can be placed via the internet and will be printed and stored in the HX-2500. Others can also be sent via iOS and Android apps which are customized for individual store operators with various forms of payment supported such as cash, credit card, debit card, Paypal and gift card.

General Features

Real-time Stock Control -

The HX-2500 comes standard with a real-time stock control system that with minimal effort, can track stock on key items.

Management Information -

A wide range of detailed reports provide managers and owners with the information they need to control and drive the business forward. The HX-2500 can be configured to automatically send sales data (in XML format) to a remote FTP server or Web based reporting service - UniPortal and MSD.Cloud.

Customer Loyalty/Marketing and Gift Card -

The HX-2500 is integrated to third party customer loyalty, marketing and gift card providers who support real-time, multi-location transactions using mobile devices.

Please contact your Uniwell Reseller/Distributor for further details.
