

Uniwell POS Australia

Australian Importer of Uniwell Point of Sale Equipment

SKILLED PARK

Skilled Park, located on Queensland's Gold Coast is a world class \$160 million stadium which was officially opened in February 2008. With a ground capacity of 28,000 it is the home of the Australian Rugby League's exciting Gold Coast Titans .

Skilled Park Stadium, built by Watpac Construction and managed by Queensland Government Sports Facilities Authority with catering organised by Michael O'Brien Catering. These 3 organisations got together during construction time to make a decision about which POS system to install to cater for the many thousands of hungry and thirsty fans on game and function days.

They were looking for a system that was fast, robust and reliable while at the same time being easy to operate by the mainly casual staff that would be serving customers on the day. The system also had to be sophisticated enough to provide a wealth of back office stock and sales information to Michael O'Brien Catering.

From a host of systems available on the market the organisers settled on a POS System supplied by Uniwell POS Australia.

The Uniwell DX915 15" touch screen system was chosen for the function rooms and the Uniwell SX705 compact terminal for general food and bar outlets. Designed and built in Japan, Uniwell has a reputation for quality and reliability and is used in stadiums around the world including Wembley Arena in the UK and Edmonton's Commonwealth Stadium in North America.

SX705

The large bright screen of the Uniwell EPOS system makes it quick and easy for staff to make sales. They quickly learn how to operate the system as it is intuitive and has been customised to the requirements of Skilled Park.

The speed of the Uniwell system maximises the number of transactions that can be completed during the mad rush of sales pre game and at half time. This in turn maximises revenue on game day and also keeps customers happy with the speedy service.

DX915

Point of Sale Terminals Installed

SX-705's x 96

DX-915's x 4

12 Bars

2 Mobile Coffee Carts

2 Function Rooms

25 Corporate Suites

2 Mobile Bars

9 Snack Bars

All 100 Registers are connected through a network consisting of Fibre Optic and Cat6e cabling to UniLynx Plus, a back office software package providing comprehensive sales analysis, stock management and register maintenance. Updates are sent and sales collected from all registers via the network in a matter of minutes!

With just the click of a button UniLynx will display total sales for each location at any time throughout the day. This essential feature gives a quick overview of sales across the entire network and allows for accurate decisions regarding staff level requirements in each location.

High staff numbers mean that security was an extremely important factor for MOBC and the Uniwell System has been designed with security in mind. Up to 8 different levels of security can be setup, allowing different access levels for staff and management.
